

OEM REPLACEMENT  
**DRAFT INDUCERS**

  
**Packard**  
Supplying HVACR solutions with your needs in mind.

**WHAT'S INSIDE MATTERS.**

# COMFORT MATTERS

What's inside your furnace—it matters. The right parts are crucial for the whole system to work properly. Original Equipment Manufacturers (OEM) require specifically built draft inducers to precisely fit their furnaces, yet dealing with OEMs can often be frustrating and expensive for the wholesaler, contractor and the homeowner.

That's why you need to feel comfortable with your supplier.

Packard distributes the widest variety of direct replacement draft inducers for popular and hard-to-find OEMs. You can feel comfortable knowing our detailed cross-referencing and technical support services will ensure that your contractors get the exact parts they need quickly, and at the best value, making it easy to bring comfort during the cold weather season to those who ultimately matter the most—the homeowners.

# PEOPLE MATTER

No one likes being left out in the cold. In the dead of the winter, your customers depend on you to get them the right parts so they can get homeowners back where they belong—in a warm home. To help your customers do their job right, you need a supplier who understands that people matter.

Unlike large OEMs, who target their attention on the equipment market, Packard has the draft inducer aftermarket experience on staff focused solely on what is essential to wholesalers and your contractors.

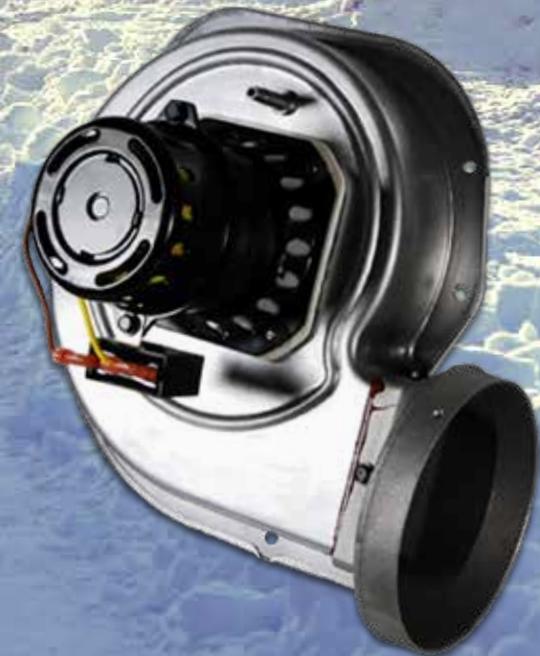

You can be assured your phone call will always be answered by a real person and that our customer service team will spend the time to ask you the right questions and get you the answers you need fast.

We understand the clock is running on a repair. We have the ability to offer you same day shipping\*, if necessary—a benefit that OEMs may not be able to provide.

\*Ask your Packard representative for same day shipping requirements, terms and conditions.

# CHOICES MATTER

Sometimes you have no choice but to accept what you're faced with and move forward. But, when it comes to OEM replacement draft inducers, you do have a choice. You no longer have to exclusively rely on the OEMs for replacement parts, or settle for high costs.

The Packard brand of draft inducers are direct replacements to all major OEM brands. We've worked carefully with our manufacturers to develop draft inducers that are safe, reliable and cost-effective drop-in replacements. Plus, we carry some of the widest varieties of replacements for both popular and hard-to-find OEMs.

# PERSPECTIVE MATTERS

Sometimes it helps to see things in new ways. Change and the road ahead may seem uncertain, but as long as you have the right people, parts and support, making a change becomes a lot easier.

Relying less on the OEM brand for replacement parts may seem like an uncertain move at first. Packard assures you that our brand of OEM direct replacement draft inducers are high-quality, value conscious parts.

Our Product Development specialists proactively work with customers and analyze industry supply and demand trends to determine which OEM equipment is coming out of warranty. Our engineers work closely with our manufacturers to craft the specific fittings required in a one-for-one aftermarket solution.

All of our draft inducers are backed by a 2-year warranty from the manufacture date or 1-year warranty from the date of installation.

## REPLACES YORK Draft Inducer

PACKARD ITEM ID	H.P.	VOLTS	AMPS	RPM	REPLACES
82702	1/50	115	1.20	3000	York: 373-10337-702, 7021-8612

# VARIETY MATTERS

Keeping homeowners warm when their heating systems fail often requires a variety of parts to complete the repair. As a one-stop HVACR supplier, you no longer need to go to multiple sources for your draft inducers, thermocouples, igniters or motors.

Our national warehouses are stocked with the full spectrum of heating components, allowing you to get the most sought after parts necessary for your contractors and almost any repair need.

Plus, we offer you the ability to combine all these purchases in one shipment, which can save you hundreds in freight costs.

## DIRECT DRIVE BLOWER MOTORS

A true cold-season staple, this truck stock item replaces most major manufacturers.

- Single or multi-horsepower
- Distinct color-coded packaging with cross-reference data
- Quick connect terminals

## Torsion Flex Mount Direct Drive Blower Motors

These energy efficient, continuous duty air-over motors feature an inventory-reducing, welded flex mount bracket for quick and easy installation.
