COPPER TUBE • HVACR

Streamline® Copper Tube provides the strength, precision and cleanliness needed for the demanding conditions of HVAC and refrigeration applications. Preferred throughout the industry, our products have set the benchmark for HVACR copper tube. Streamline® Nitrogenized® ACR Copper Tube is pressurized with nitrogen to provide maximum protection against the formation of harmful oxides normally formed during brazing operations. Reduction of these oxides greatly reduces system contamination. Streamline® Refrigeration Service Tube is of a consistent dead soft temper, bright, thoroughly dried/dehydrated and packed in shrink wrapping plus individual cartons for the highest level of protection.

- Made to applicable ASTM standard B280

COPPER TUBE • PLASTIC COATED

Streamline® Plastic-Coated Copper Tube is manufactured in a variety of options for use when copper tube is to be buried or used in a potentially aggressive environment. Some building and insulation materials may contain chemicals that are potentially corrosive to plain copper tube, requiring it to be protected to ensure its longevity in service. Our plastic-coated copper tube eliminates the need for on-site tape wrapping or sleeving, creating a savings on labor and ensuring a professional-looking installation. It can be used in a wide variety of situations including reclaimed water applications and the movement of natural gas.

* Type K & L water tube only.

- For use in above-ground potable water supply systems
- Constructed of high-grade copper
- Made to applicable ASTM standards B88, B280
- Meets NSF 61G

INSERT FITTINGS

Streamline® Insert Fittings are available in polypropylene. These fittings are designed to connect flexible polyethylene plastic tubing using either clamps or compression fittings. Because polyethylene plastic tubing comes in long coils, requires more support and is subject to kinking if bent too far, the ease of use and reliability of our insert fittings simplifies the installation of flexible plastic tubing and hosing systems.

- Use in the installation of flexible plastic tubing and hosing in cold-water applications including underground sprinkler systems
- Smooth walls prevent scaling and provide for free flow
- Compatible with polyethylene tubing
- Made to applicable ASTM standards D2609 & F1498
- Meets NSF 14 and 61G
